

Access California Standards in INSPECT

Illuminate recently made changes in INSPECT which removed the California standards from the default collections. However, these can be re-added by following these steps

Access the Itembank from Illuminate

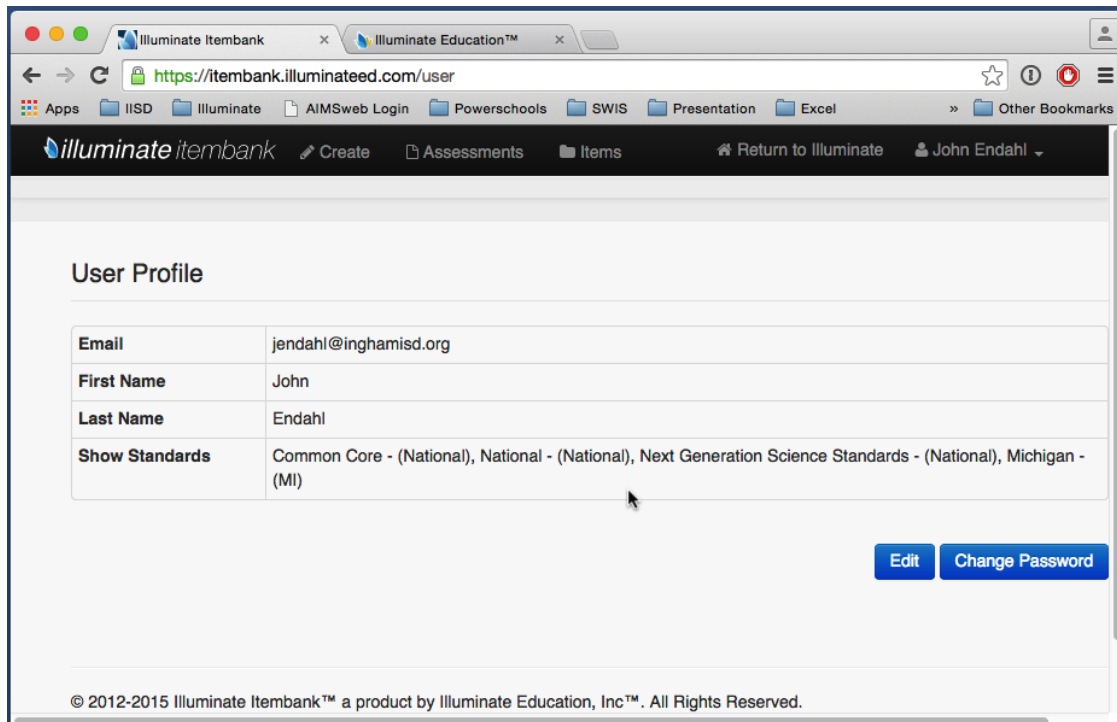

Access the Itembank by selecting Assessments>Visit Itembank in Illuminate. If you are prompted to create an account, use the same credentials that you use in Illuminate.

Access the Item Bank settings

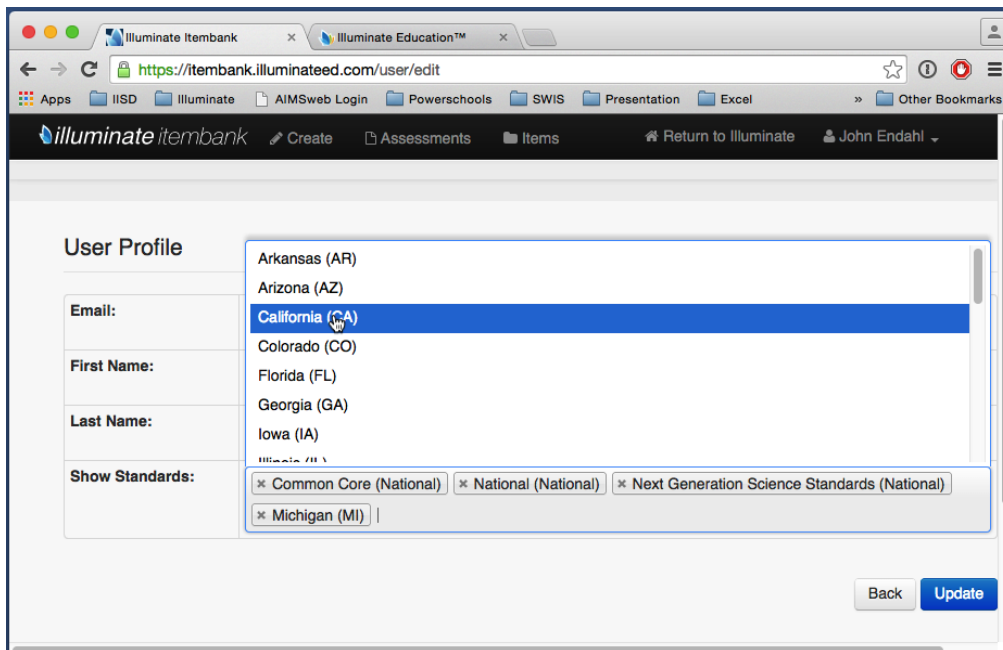

Once you are in the item bank, click your name in the upper right hand corner of the screen, and select "Settings".

View the User Profile

Once you select Settings, you will see your user profile, and the Standards Collections you can access. Click in the Show Standards box to add additional standards.

Add additional states to your collections

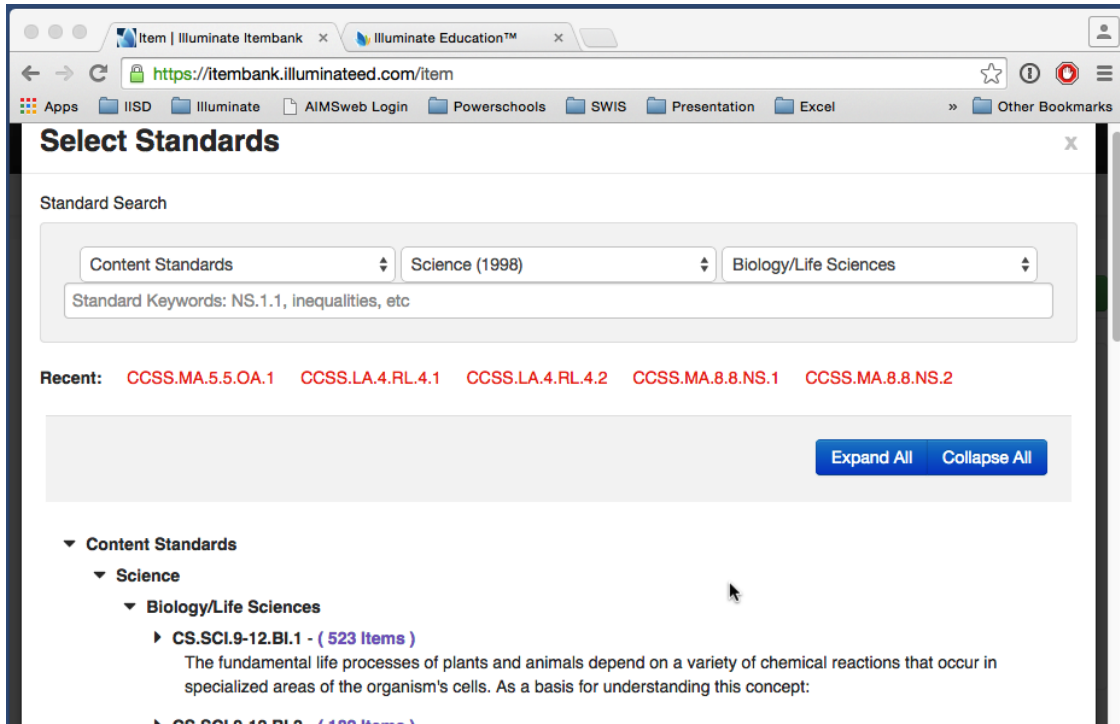

After you click in the "Show Standards" box, you will see a list of states. Select "California" or any additional states you wish to view. (California has many items in science and social studies that our teachers have found useful when creating assessments using INSPECT).

Click the Update button when you have added all the states you wish to include.

Additional standards are now available

- ▲-----
- National Standards for Students
- P21 Framework for 21st Century Learning
- Next Generation Science Standards (National)
- Arranged by Disciplinary Core Idea (DCI)
- Crosscutting Concepts Appendix G
- Next Generation Science Standards Arranged by Topic
- NGSS by DCI with DCI content
- Science & Engineering Practices Appendix F
- California (CA)
- Career Technical Education Model Curriculum Standards
- Common Core Content Standards
- ✓ **Content Standards**
- Curriculum Frameworks
- Estándares Comunes Estatales para California
- Next Generation Science Standards Arranged by Topic
- NGSS Alternative Discipline Specific Courses
- NGSS Arranged by Disciplinary Core Idea (DCI)
- Preschool Learning Foundations
- Translated California Content Standards
- Michigan (MI)
- Curriculum Framework
- Early Childhood Standards of Quality for Preschool
- Extended Grade Level and High School Content Expectations
- Grade Level and High School Content Expectations

You will now have the additional state standards available to you when selecting standards.

In this screenshot, I have selected the California Content Standards for Science (Biology/Life Sciences) and should be able to access and select items in INSPECT aligned to those standards.
